Navigation Inventories

Parallel Ruler

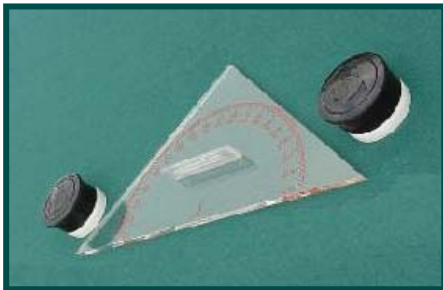

Parallel ruler is intended for drawing straight lines parallel to preset direction on the sea charts.

Parallel ruler consists of two organic-glass rulers interconnected with bars.

Ruler length is 450 mm, folded width is 70 mm, maximum opening between drawing edges is 135 mm, weight (w/o sheath) is 275×30 g.

Navigator's Protractor

Navigator's protractor is intended for constructing and measuring angles and drawing straight lines parallel to the preset direction on the sea charts.

Protractor is made of organic glass as a right triangle with legs of 236 mm.

Protractor's measurement limits are 0 to 180° to 360°, division is 1°, weight (w/o sheath) is 190±20 g.

Chart Weights Ø46×30

Compass Reading Glass

Compass reading glass is intended for magnification and ease viewing compass's readings.

Diameter of the ЛКМО-Т glass is 145 mm, of the ЛК is 127 mm.
